Now try this:

Make up your own song using the Eb pentatonic scale.

At first you might want to just use the first 3 notes: Eb F G. Just move from note to note.

Then try using all 5 notes: Eb F G Bb C. Take your time moving from note to note.

It usually starts to make more sense after you've been trying it awhile. This is one way that composers write their music: Use a certain set of notes and just try them out. Get busy!
